Multi Hub
4 Port Powered USB Hub

Multi-connectivity couldn't be easier

When you want to use several USB devices at once, or you are working on a Mac or PC, the Swann Multi Hub has four bidirectional ports which allows easy hot-swapping.

Supporting bus-powered and self-powered USB peripherals (including printers, scanners, modems, keyboards, mice, joysticks and more), it provides convenient access to a USB port, instead of the rear panel of your computer. Multi-connectivity couldn't be easier.

Technical Specifications

Auto-external shut down
Full compliance with USB Spec Rev 1.1
UHCI and OHCI compatible
1.5Mbps/12Mbps transmission rate
Dual-Powered
1 host port, 4 downstream ports
Over-current protection in gang mode, or per port mode
